

# Skoglund Enterprises Ltd.

To Whom It May Concern

Feb 15 2016

Encan Construction recently completed a Construction Management project for Skoglund Enterprises in Vernon B.C. The scope of work was to manage the erection and completion of a steel pre-fab building purchased from ModernWash. ModernWash is a company specializing in the construction of steel and acrylic carwash buildings and is situated in Kentucky U.S.A. Encan handled all the site work, concrete forming and erection of the building. They also handled the complete bidding process and we were very happy with the sub-trades selected. Skoglund Enterprises looked after D.P., Building permit, architectural drawings and the installation of the carwash equipment. Lee from Encan and his crew also provided some assistance in equipment installation. The project after approval began in June 2015 and ended in January 2016.

We were extremely pleased with the overall execution by Encan. Lee and his crew did an exceptional job in bringing the project in on time and under budget. Any minor glitches were handled quickly and with a minimum of hassle to us. Lee is a hands-on kind of foreman and always moved things along quickly and efficiently. He dealt with Tim Hogue from ModernWash with delivery times and deficiencies and handled them quickly. We ended up with a building we are very proud of and believe the City of Vernon will be as well.

The paperwork which was handled by Sue Chapman was impeccable and as a result very easy for our office to deal with.

Mick, Lee and Sue are a great team and myself and my 2 sons Chris and Jason would highly recommend them for your construction project.

Yours Truly

Dave Skoglund
