

**DISTRICT
OF
SICAMOUS**

REFERENCE

TO: Whom it may concern
FROM: Jason Angus, Engineering Technician
DATE: May 24, 2012
SUBJECT: District of Sicamous – Civic Center

In the July of 2010, Encan Construction was the successful contractor to be awarded the construction of the Civic Center here in Sicamous, British Columbia. The project consisted of construction through a cold winter. The project was also design to leed specifications with a goal of gold status. Some of the items are as follows:

- District staff offices, Council Chambers, Library, Museum, Visitor information center
- Re-useable products
- Recyclable products
- The use of Green building techniques
- Project Management

Encan Construction is a contractor that can keep the project moving forward. With hurdles and changes to the contract, Encan was able to work through and still have the building complete by a specific date.

I would not hesitate to award Encan Construction with another project here in District of Sicamous.
